

TIPS TO CARE FOR YOUR BLINDS IMPORTANT - Please read these tips carefully before proceeding. The below acts as a guide only.

VERTICAL BLINDS If you are cleaning a PVC fabric, use a clean, damp cloth without any product and gently wash over the slats.

Other Vertical Blind fabrics can be cleaned using the upholstery attachment on your Hoover. Instructions for our specialist machine washable fabrics can be found on a separate document under our Guides section.

ROLLER BLINDS If you are cleaning a PVC fabric, use a clean, damp cloth without any product and gently wash over the Roller Blind.

Other Roller Blind fabrics can be cleaned by using a clean, dry cloth without any product and gently dust over.

VENETIAN & PERFECT FIT BLINDS Whether you are caring for a Real wood, Fauxwood or Aluminium Venetian Blind, use a clean damp or dry cloth, without any product and gently clean each slat.

You may use a mild detergent on Aluminium Blinds if it is considerably dirty. Be careful not to clean too vigorously as the slats could bend.

ROMAN BLINDS Vacuum with care using the upholstery tool.

SHUTTER BLINDS Use only a clean, damp cloth without any product.
